

Compact electric actuator for 90° operation, complete with the intelligent control unit ICON 2000 to fit small valves.

Mechanical features

- Light weight and compact design, mounting flange acc. ISO 5211
- Constant torque for complete operating stroke
- Torque control in both rotation directions
- Double spur gear reduction and planetary gear system for a high reduction ratio with inherent self-locking characteristics.
- All gearing with cut teeth, metal made, running in oil for high and constant efficiency and low power consumption
- All rotating parts supported by roller bearings and a permanent oil lubrication
- Manual operation always engaged but not rotating during automatic operations
- Mechanical adjustment of the position by mechanical stops connected directly to the actuator housing
- Anodized aluminium enclosures, protection by epoxy-polyurethane painting

Features ICON 2000

- Easy set-up and commissioning
- Initial tuning without unscrewing a single bolt or nut
- Reduced set-up time
- Double displays
- Position indication in case of power failure
- Local push buttons for full actuator access
- Password protection to avoid unauthorized access
- Diagnostics are displayed in one of the available languages for both alarms and warnings
- Reduced number of parts ensures higher reliability and lower maintenance cost

Environment protection

- **Only waterproof**
IP 68 according to IEC 529 and CEI EN60529 (15m dept/90 hours), or alternatively NEMA 4, NEMA 4X and NEMA 6 according to NEMA ICS6.
- **Standard explosionproof degree**
Eex-d IIB T4 according to EN50014, EN50018 and EN50281-1-1 Class I, div. 1 group C and D – Class II, III, div. 1 groups E, F and G.

IP 68 according to IEC 529 and CEI EN60529 (15m dept/90 hours), or alternatively NEMA 4, NEMA 4X and NEMA 6 according to NEMA ICS6

General application

Suitable for actuation of ball, plug, butterfly valves or dampers.
Heavy duty applications such as oil and gas, petrochemical, power and water industries.

Technical data

Voltages : 110/220V-1Ph-50Hz
115/240V-1Ph-60Hz
230/400V-3Ph-50Hz
240/415V-3Ph-50Hz
440/480V-3Ph-60Hz

Torques : up to 600 Nm

Time/90° stroke : from 6 up to 60 sec.

Temperature : -30°C to +85°C
For other temperature ranges please contact Sales office

Control Package Features

- Torque/position end-of-travel limits (1)
- Position display (1)
- Three push buttons (open-stop-close) (1)
- Two bi-coloured LEDs (open/opening; close/closing) (1)
- Selector switch (local-off-remote) (1)
- Remote control via dry contacts (1)
- Reversing contactor (1)
- Control transformer (fused primary and secondary) (1)
- Local selector switch status (1)
- Auto-phase correction (1)
- Single phase protection (1)
- Monitor relay (1)
- Speed control (timer) (1)
- Remote control via 24 volt thru 125 volt AC or DC signal (1)
- Motor running indication (1)
- Alarm bi-coloured LED (1)
- Emergency shutdown (ESD) (1)
- 4-20 mA input and output (2)
- 4-20 mA output (selectable Position or Torque) (2)
- Network options:
 - ProfiBus DP (2)
 - FieldBus foundation (2)
 - LonWorks (2)
 - ModBus (2)
 - DeviceNet (2)
- Non-intrusive torque and position limit settings (1)
- Configuration parameters are set locally or remotely (1)
- High/low internal temperature alarm (2)
- 3 1/2 digits LCD display for Position (1)
- 2 x 16-character lines alphanumeric display for configuration, diagnostics and visualisation (1)
- Auxiliary battery (remote position transmission) (2)
- Jammed valve protection (1)
- Auxiliary heater (2)
- Instantaneous reversal protection (1)
- Programmable torque/position end of travel (1)
- Maximum torque alarm (1)
- Electronic temperature alarm (1)
- Programmable clockwise or counterclockwise valve rotation (1)
- Electronic nameplate (1)
- Data log (storage of main events) (1)
- Alarm diagnostics (1)
- Programmable in five languages (1)

Notes

- (1) Base unit
- (2) Optional module

Test summary

- **Life test**
Standard F01-2000 life test is based on AWWA 540-93 for a minimum of 10,000 cycles.
- **Vibration test**
F01-2000 are certified as per IEC 60068-2-6-Appendix B (plant induced): frequencies from 1 to 500 Hz (in 3 axes) with 2.0g peak acceleration. Sweep cycles in each axis: 10.
- **Seismic test**
F01-2000 are tested in accordance with IEC 60068-2-57: frequencies from 1 to 35 Hz (in 3 axes) with max 2.0g peak acceleration. Verification of structural integrity at 5g. endurance of oscillogram: 30 seconds.
- **Environmental test**
F01-2000 are tested according to the following standards: IEC 68-2-1 (cold) up to -55°C, IEC 68-2-2 (dry heat) up to +85°C, IEC 68-2-3 (damp heat) up to +40°C with 93% relative humidity.
- **Salt spray test**
F01-2000 external coating is tested for resistance to salt spray for 1,500 hours according to ASTM B117/IEC 68-2-11.
- **Noise test**
F01-2000 are tested according to EN 21680. Noise level is less than 65 dB (grade A) at 1m distance.

General Configuration

ACTUATOR

Position retransmission output

GROUND

Position request input

Position retransmission output

GROUND

Position request input

Notes:

- 1) B1-B2 : Internally linked
- 2) C1 : +24 Vdc not regulated, max 4W
- 3) Control signal levels: Minimum "ON" >20Vdc or 20Vac (50/60Hz)
Maximum "ON" <125Vdc or 120Vac (50/60Hz)
Maximum "OFF" <3 Vdc or ac
Minimum signal duration > 300ms
Total current drawn for remote controls <25mA
Total current drawn for ESD controls <15mA
- 4) Monitor relay:
Voltage free, change-over contact- max voltage 250Vac or 30Vdc- max current 5A/min, voltage 5Vdc - min. current 10mA
See instruction manual to view or configure the switching conditions of relay
-E2/D1 contact is closed when the configured condition occurs

- 5) AS1, AS2, AS3, AS4, AS5, AS6, AS7: Voltage- free contact. Max voltage 250Vac or 30Vdc - max current 5A / Min voltage 5Vdc - min current 10mA. Contact can be configured to make or break on condition. See instruction manual to view or configure switching conditions of relays.
- 6) AS8 : Voltage free, change-over contact- max voltage 250Vac or 30Vdc- max current 5A/min, voltage 5Vdc - min. current 10mA
See instruction manual to view or configure the switching conditions of relay
-C9/D8 contact is closed when the configured condition occurs

- 7) A1, A2, A3 : Internal supply 24Vdc
- 8) B1, B2, B3 : External supply 20-125Vdc or 20-120 Vac (50/60Hz)

9) Controls mode:

Option A1/B1 : 4 wires latched (SP configuration = BREAK)

Option A2/B2 : 3 wires push to run

: 3 wires latched with instant reserve

Option A3/B3 : 2 wires open contact opens

: 2 wires open contact closes

10) A/M Open: Remote/Auto Actuator control by 4-20mA input signal

A/M Closed: Remote/Man Actuator control by remote push-buttons

4-20mA CONNECTIONS IF EXTERNAL SUPPLY IS USED

IN 4-20mA+

IN 4-20mA-

At customer care

4-20mA CONNECTIONS IF INTERNAL SUPPLY IS USED

max 250 OHM

IN 4-20mA+

IN 4-20mA-

At customer care

4-20mA generator

See instruction handbook to configure options A1, A2, A3, B1, B2, B3.
For 4-20mA connections see MAN 618/5, optional modules PSM1 and APTM1.

Remote STOP control SP can be configured to perform the STOP action when the contact is open (break) or closed (make).

Option A1)

Option B1)

Option A2)

Option B2)

Option A3)

Option B3)

Option E1)

Option E2)

INTERLOCK CONNECTIONS

Option E1: Internal supply 24Vdc INTERLOCK active with closed or open contact (to be configured)
Option E2: External supply 20-125 Vdc or 20-120 Vac (50/60Hz) INTERLOCK active with closed or open contact (to be configured)
See Instruction handbook to configure INTERLOCK signal type

Option D1)

Option D2)

ESD CONTROLS

Option D1: Internal supply 24Vdc ESD active with closed or open contact (to be configured)
Option E1: External supply 20-125 Vdc or 20-120 Vac (50/60Hz) ESD active with closed or open contact (to be configured)

See instruction manual to configure ESD signal type, ESD action and priority.
If customers wish to have the thermostat by-passed during ESD operation, it should be noted that any certification for actuator enclosure in hazardous area will be invalidated.

LEGENDA

M	=	Three-phase motor
Th	=	Motor thermostat
OP	=	OPEN control
CL	=	CLOSE control
SP	=	STOP control
K1	=	Opening/Closing contactor

Notes

1. The above characteristics are referred to the actuators with 3-phase or 1-phase asynchronous motors
2. For modulating duty, please contact Sales office.

Definitions

- Actuator duty according to IEC 34-1: On-Off: S2-30 minutes
Inching: S4-25%, max 200 starts/hour
- Nominal torque = the output torque given by the actuator when the torque device is set and trips at max settable value of its scale
- Stall torque = from 1.4 to 2 times the nominal torque
- Time for 90° rotation = the actuator nominal operating time when the running torque is yielded
- Running torque = 0.4 times the nominal torque
- Hand-wheel torque factor = multiply the required output torque by this factor to obtain the hand-wheel torque
- Bold-faced values represent the performances of Standard models with 3-ph motors
- Identification code: Model/Nominal torque-time at 50 or 60Hz
e.g.: F01.150-052/150-12

Definitions

- **KW** = motor nominal power
- **RPM** = motor nominal speed in round per minute
- **In** = nominal current of the motor, according to IEC 34-1, which approximately corresponds to 40% of the actuator nominal torque
- **Is** = current which approximately corresponds to the actuator nominal torque (torque set 100%); we recommend the selection of cables and protections based on the above values
- **Icc** = locked rotor current
- **PF** = power factor
- **Eff** = motor efficiency

Motor insulation class H

Motors duty according to IEC 34-1

For ambient temperature up to +65° C: - S2-30 minutes or S4-25%, max 200 starts/hour

For ambient temperature up to +85° C: - S2-15 minutes or S4-25%, max 60 starts/hour

Tolerances

- Nominal Voltage Tolerance: ± 6%
- Nominal Frequency Tolerance: ± 2%
- Momentary max permissible voltage variation: +10%; -15%
- Other tolerances according to IEC 34-1

Notes

The current values shown on the table are referred to motors with Star connection; when the phases are Delta-connected multiply the current figures by factor 1.73

Overall dimensions

Cables entries	a	b	c
NPT #	1"	1" 1/2	1"
ISO Rc 7/1 •	1"	1" 1/2	1"
EN 5026 •	M32x1.5	M40x1.5	M32x1.5

Notes

* = space for cover removal
 # = standard version
 • = optional version, available on demand
 Not certified drawing: certified dimensions will be supplied on request.
 All dimensions are in mm

Notes

1. Insert bush supplied by BIFFI with unmachined bore; larger bores can be supplied with solid piece bush
2. Fixing bolts or rods supplied by BIFFI only on request, minimum material required ISO class 8.8
3. dx= the maximum accepted diameter described by the key
4. Position of the shaft with closed valve
5. Additional ISO PCD is provided as shown in column FL

Definitions

- **KW** = motor nominal power
- **RPM** = motor nominal speed in round per minute
- **In** = nominal current of the motor, according to IEC 34-1, which approximately corresponds to 40% of the actuator nominal torque
- **Is** = current which approximately corresponds to the actuator nominal torque (torque set 100%); we recommend the selection of cables and protections based on the above values
- **Icc** = locked rotor current
- **PF** = power factor
- **Eff** = motor efficiency
- **Cap** = capacitors value measured in microFarad

Motor insulation class H

Motors duty according to IEC 34-1

For ambient temperature up to +65° C: S2-30 minutes or S4-25%, max 200 starts/hour

For ambient temperature up to +85° C: S2-15 minutes or S4-25%, max 60 starts/hour

Tolerances

Nominal Voltage Tolerance: ± 6%

Nominal Frequency Tolerance: ± 2%

Momentary max permissible voltage variation: +10%; -15%

Other tolerances according to IEC 34-1

Model F01-600

Overall dimensions

Cables entries	a	b	c
NTP	1"	1" 1/2	1"

Mechanical stops

Mechanical stops

Coupling flange according to ISO 5211 ISOF10/ISOF12

Mass 32 Kg.

*Space for cover removal

Models F01-150 & 300

Overall dimensions

Cables entries	a	b	c
NTP	1"	1" 1/2	1"

Mechanical stops

Mechanical stops

Coupling flange according to ISO 5211 ISOF07/ISOF10

Mass 31 Kg.

*Space for cover removal
