

The reliable gate valves for the water treatment industry and industrial applications

Features

- Wedge type
- Full bore opening
- High quality gate finish for optimum sealing
- Metal to metal seats
- High reliability
- Very low maintenance
- Drop tight shut off
- Tailor made to customer request
- Suitable for manual operators as well as electric, pneumatic and hydraulic actuators
- A range of seat ring options available
- Bypass valve optional

General applications

Suitable for waterworks, sewerage systems, steam applications and gases.

Technical data

Pressure (bar) : 2.5/4/6/10/16
Temperature (°C) : max. 150
Sizes (mm) : 40 - 2000
(larger sizes on request)
Flange accommodation: to BS / ISO / DIN / ANSI / JIS / etc.

Materials

| | |
|---|--|
| Body | Ductile cast iron ASTM A536 / DIN 1693 / BS 2789 |
| Bonnet | Ductile cast iron ASTM A536 / DIN 1693 / BS 2789 |
| Wedge | Ductile cast iron ASTM A536 / DIN 1693 / BS 2789 |
| Seat rings | Brass, naval brass, gunmetal, stainless steel, bronze |
| Spindle | Brass, naval brass, gunmetal, aluminum bronze, stainless steel |
| Other materials (e.g. cast steel, ni-resist or other alloys) on request | |

Parts list

| Part | name |
|------|------------|
| 1 | Body |
| 2 | Bonnet |
| 3 | Wedge |
| 4 | Seat rings |
| 5 | Spindle |

Face-to-face length and pressure ratings

| Diameter [mm] | Flat Body type LAW (RGL) face-to-face 0,4D+150 | | Flat body type ELAW (RGE) face-to-face | | Oval body type HAW (RGH) face-to-face D+200 | |

Configurations

- Inside screw, non-rising spindle
- Outside screw, rising spindle
- Metal-to-metal seating
- Stuffing box and gland spindle seal
- O-ring spindle seal
- With/without gear box
- With/without by-pass
- Manual/electric/hydraulic/pneumatic operation
- Special construction for horizontal installation available

Note

- * special face-to-face
- ** on request
